

Gateway software for:

**MOTOTRBO™ Professional Digital
Two-Way Radio System**

Following are the 3 gateway software companies that SAI has worked with for SynergyMMS.

PREFERRED

Jeff Silberberg

jms@dapage.net

DAPage, LLC

Atlanta, GA 30350

(770) 399-9464

<http://www.dapage.net>

This product is the DAPage solution has a long history of providing these types of solutions. They handle a lot of 911/EMS message traffic so they have a very robust approach and excellent support. Their solution does not use public email addresses and their box creates a secure connection from the property to their messaging servers. This solution likely requires the least amount of local IT support. They do have ongoing fees but the service, security, reliability and methodology may be worth it.

ALTERNATES

Alessandro Gotti

TABLETmedia, Inc.

Wrk: +1 (415) 567-8100 x202

Mob: +1 (415) 706-0059

This product is called Text@Turbo and uses public email addresses such as Gmail to catch and forward messages to and from SynergyMMS. There is a hardware box (all-in-one) or software solution (PC required) installed onsite that plugs into the network so firewalls may be an issue with traffic to/from Gmail. I am not aware of any ongoing fees with this product.

Ira Knigin

Brooklyn, New York 11234

Phone 718-531-7676

Fax 718-968-1679

This product is called the Simple Email Gateway and is a software solution that requires a PC on site to run it. This solution also uses public email addresses for messaging so the same firewall issues are a consideration. I don't think this product has any ongoing fees either.
